Doctor of Audiology (DAUD)

Department of Speech and Hearing Sciences (SPHS) at Lamar University

Annual Program Report

Year:	2022-2023
Program:	Doctor of Audiology
Contact Person (include email & phone#)	Lilian Felipeaudiology@lamar.ed/ulfelipe@lamar.ed/u409-880-7900

Summary of Continuous Improvement Efforts since Last Report

Provide a brief description of how assessment results have been used for program improvement. Point to a specific example of how an assessment provided the program with data it could use for improvement and what that improvement was, if possible, also show evidence of the improvement. You may look at data from th

We regularly report annual data concerning our curriculum, speadify in relation to Standard 3 of the Council on Academic Accreditation in Audiology and SpeechLanguage Pathology. This includes ensuring that our courses align with national student learning outcomes, knowledged ands. Sta streamline the learning experience for our students, program faculty have identified final "capstone" courses for each standard and eliminated ar unnecessary duplication of course content across multiple courses, except in cases where such duplication is intentieficially foestudent success. We can provide additional examples of improvements made to the program upon request, along with supporting document across and success.

Program Highlights Since Last Report

Identify and briefly discuss any programmatic curriculum changes made since the last report (e.g. new courses, course changes, SLO changes, course deletions).

Respond here:

Since the last report, the DAUD program has witnessed changes in its faculty leadership. Currently, Peripetilizer ves as the program director, bringing her expertise and vision to guide the program effectively. Furthermore, Dr. Ashley Dockens has been promoted to the soleiate ADean of Policy and Procedure for the College of Graduate Studies. Her for proeition has been posted, initiating a national search process that commenced in June 2023. Dealing with faculty overload has been an ongoing concern for the program. To tackle this issue, we are actively collabitor stirllege and University leadership to explore solutions for additional faculty growth. By engaging in these discussions, we aim to alleviate the burdsting faexilty members while maintaining the quality of education provided by the program.

Ensuring diversity within our cohorts hasen apriority for the DAUD program. Through careful analysis of internal and national data obtained from our centralized application system, we have implemented modifications in the application and admission processes. These advantaged positive results, as evidenced by the program now boasting some of the highest national averages of diversity, as indicated by latational CSDCAS.

Based on the data submitted to our national accreditor, we have recognized the need to enhance our DAIdity paradicedures. As a result, we have introduced a structured "semester cheek

CAAestablished threshold(Standard 5.7). Having achieved and surpassed our goal of 100% final pass rate of the Praxis examination (Standard 5.6) our program is now focused on enhancing the first-time pass rates of our students. To track our progress in this area, we will maintain records of both final passing rates and the results of first time attempts reported by our	Praxis Pass Records(ETS)	The number of students taking the National Examination (Praxis) and passing during first-time attempt professional workforce will be evaluated from Praxis records from Educational Testing Service (ETS).The	73% ofstudents will pass the Praxis exam on the first attempt.	Whenanalyzing the cohort of students from 2022-2023, it was observed that 50% of them successfully passed the exam on their first attempt.	Half of students passed the Praxis exam on the first attempt. Among the remaining half who did not pass initially, 60% attempted the exam prematurely without adequately establishing the necessary foundations for success The findingsfrom these results emphasize the importance of providing guidance and counselig to our students regarding the optimal timing for taking the raxis exam to maximize their chances of a successful first

Despite successfully meeting and surpassing this goal in recent yea, it is necessary for uto keepmonitoring of this metric. This is due to the program undergoing cha1(du)

performance

in order to better understand and address this variance

Although we have achieved or surpassed this gc P deficiencies in faculty expertise have highlighted the need for curriculum changes and the expansion of faculty composition. To address thi the program is actively seeking additional faculty members and exploring the most effective ways provide necessary courses in the interim.

towards determining its cause. By doing so, we a to further improve our program and ensure consistent outcomes for all cohorts.

While we have achieved surpassed this goal in recent years, ongoing monitoring is necessary d to program changes related to the capstone cou associated with this learning outcome.

To ensure continuity in delivering the capstone course, the program is actively seekingtimal solutions. The upcoming offering in Fall 2002II be teamtaught by all faculty members last year. The program is committed to finding the be possible approaches to offer this course while
